Thursday, December 11th - KCS Holiday Express Train - Park at TISD Tiger Stadium at Grim Park
Line up to be shuttled to train will begin at 5 p.m.

Mayor Bruggeman expressed sympathy for the passing away of Mr. Al Hanna. Mr. Hanna was the voice of the Texas High Tigers for 50 years. During his 50 year broadcast, Mr. Hanna only missed a total of three games. His services were held on Monday, November 10th. Council Member Veal-Gooch mentioned that the memorial service was wonderful and appropriate for Mr. Hanna.

Mayor Bruggeman announced that a celebration was held for the official opening of I-49 from Texarkana to Shreveport. The Mayor commended Swede Lee and Curt Green for all of their hard work and efforts made during this project.

The Mayor thanked all city staff and volunteers involved in the "Believe in Beverly" clean-up that took place on Friday, November 7th.

The Mayor welcomed students from the Liberty-Eylau Independent School District and Texarkana Independent School District and thanked the students for attending the council meeting.

Information and Presentation

Keep Texarkana Beautiful (KTB) Award Presentation for the Month

Mayor Bruggeman, Ward 6 Council Member Davis and Ward 5 Council Member Miller presented the Keep Texarkana Beautiful (KTB) awards.

Residential:

September - Ward 6 - David & Jennie Coston

October - Ward 6 - Pam Elliot - Ms. Elliot accepted the award and thanked KTB and the City Council.

Business:

September - Ward 6 - Meineke Car Care Center

October - Ward 6 - Crocker's Jewelers

Appointments to Boards & Commissions

There were no appointments made to any boards or commissions at this portion of the meeting.

IV. OPEN FORUM: COMMENTS FROM THE PUBLIC (LIMIT 5 MINUTES EACH)

Items scheduled for "Public Hearing" or have been heard at a previous "Public Hearing" are not to be addressed at the "Open Forum".

Alexandra Webb addressed Council with a doctoral presentation on playgrounds that focus on children with special needs. Ms. Webb submitted a handout to the Council.

Pastor Donald Ryan addressed Council that the Beverly Blitz clean-up on Friday, November 7th was awesome. It was a great turnout and well organized. Pastor Ryan still envisions using the Beverly Center as a resource for the youth. Council Member Casteel asked the City Manager if staff can follow-up with Pastor Ryan's request on reopening the Beverly Center. City Manager Whitson responded that the Parks & Recreation Director is currently working on reutilization of this facility.

Council Member Ray stated that she appreciated seeing the City Manager at the Beverly Blitz clean-up.

V. ITEMS FOR CONSIDERATION

Council Member Veal-Gooch returned to the council meeting at 7:19 p.m.

RESULT:

MOVED FORWARD

Next: 11/24/2014 6:00 PM

VIII. SECOND BRIEFING WITH UPDATES

None.

IX. SECOND BRIEFING WITHOUT UPDATES

None.

X. ITEMS FOR DISCUSSION

Staff Updates - Additional Water Tower Logo Photo

City Manager Whitson showed the Council an additional photo option for the water tower logo submitted by Council Member Matthews. The additional photo is a display of the Texarkana Chamber of Commerce logo. Mayor Bruggeman asked if staff could inquire of the Chamber if any plans currently or in the future will be made to change the chamber logo. City Manager Whitson said the Public Information Officer will ask and verify with Chamber staff.

XI. ADMINISTRATIVE COMMENTS

1. Council Members

Council Member Miller asked if there was an update on getting a hold of the owner of the property where the old Masonic Lodge building rubble currently stands. City Manager Whitson said, yes, he spoke to the current owner last week. The current owner said he is in the process of transferring ownership of the property and asked the city to contact him again in about ten days. City Manager Whitson said he would follow-up per the owner's request.

Council Member Matthews thanked Mayor Pro-Tem Veal-Gooch for attending and reading the proclamation at the NAACP Awards Banquet held on Saturday, November 1st. Council Member Matthews also thanked Council Member Brad Casteel, Texarkana, Arkansas Mayor-Elect Ruth Penney Bell, and Texarkana, Arkansas Ward 2 Director Laney Harris for attending and supporting the NAACP Awards Banquet.

Mayor Bruggeman congratulated Council Member Matthews on receiving the G.W. Thompson Professional Award at the NAACP Awards Banquet.

Mayor Bruggeman also said he and Council Member Davis were attending the Marine Corp Ball on the same night as the NAACP Awards Banquet on November 1st.

2. City Staff

No comments were made by staff.

XII. ADJOURNMENT

Motion to adjourn.

(7:24 p.m.)

RESULT:	ADOPTED [UNANIMOUS]
MOVER:	Bill Miller, Ward 5
SECONDER:	Brian Matthews, Ward 4
AYES:	Casteel, Ray, Veal-Gooch, Matthews, Miller, Davis
EXCUSED:	Bruggeman

City Secretary

Bob Bruggeman
Mayor

Briefing Sheet

Update Date: 10/24/2014 8:42 AM

Lead Department: Assistant City Manager **Action Officer:** Shirley Jaster, Assistant City Manager

Subject: Keep Texarkana Beautiful (KTB) Award Presentation for the Month

Background Information:

The purpose of Keep Texarkana Beautiful (KTB) is to empower the community to create a cleaner, more beautiful Texarkana through volunteerism, education, community involvement and public awareness. A beautification award sign, provided by KTB, is presented by the Mayor each month to a resident and business owner to recognize outstanding landscaping and beautification. The KTB sign can be proudly displayed in their yard.

Photos attached.

RESOLUTION NO. 2014-133

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF TEXARKANA, TEXAS, AUTHORIZING AND SETTING A SPECIAL MEETING FOR MONDAY, NOVEMBER 17, 2014 AT 6:00 P.M. TO CANVASS AND DECLARE THE RESULTS OF THE LOCAL OPTION AND CHARTER AMENDMENTS SPECIAL ELECTION HELD ON NOVEMBER 4, 2014 IN THE CITY OF TEXARKANA, TEXAS; AND ESTABLISHING AN EFFECTIVE DATE.

WHEREAS, the City of Council of the City of Texarkana, Texas on the 11th day of August 2014 duly passed Ordinance No. 2014-097 calling a special election to be held on the first Tuesday in November, 2014, same being the fourth (4th) day of November, 2014, for the proposed update and revision of the existing city charter to qualified voters of the City of Texarkana, Texas; and

WHEREAS, the City Council of the City of Texarkana, Texas on the 11th day of August 2014 duly passed Ordinance No. 2014-099 calling a special election to be held on the first Tuesday in November, 2014, same being the fourth (4th) day of November, 2014, for the purpose of a local option election presenting the issue of the “legal sale of beer and wine for off-premise consumption only” to qualified voters in the City of Texarkana, Texas; and

WHEREAS, the November 4, 2014 special election has been held in the City of Texarkana, Texas and the vote results are to be canvassed and declared by the City Council pursuant to Section 67.003(c) of the Texas Election Code for period for official canvass;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF TEXARKANA, TEXAS:

SECTION 1: That the City Council authorize and set a special meeting to canvass and declare the results of the local option and charter amendments special election held on November 4, 2014.

SECTION 2: That the Special Meeting of the City Council is hereby scheduled for Monday, November 17, 2014 at 6:00 P.M.

SECTION 3: That this Resolution shall be in full force and effect from and after its passage and approval.

PASSED AND APPROVED in Regular Council Session on this the 10th day of November, 2014.

RESOLUTION NO. 2014-129

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF TEXARKANA, TEXAS, CONFIRMING AND REESTABLISHING THE BUILDING AND STANDARDS COMMISSION AND ITS MEMBERS TO CURRENT ONE (1) YEAR TERMS AND CURRENT TWO (2) YEAR TERMS; AND ESTABLISHING AN EFFECTIVE DATE.

WHEREAS, the Building and Standards Commission was created by Ordinance No. 260-89 for the purpose to order the repair of substandard structures to meet code specifications, or in the alternative, to order removal of such substandard structures; and

WHEREAS, the reestablishment of the Building and Standards Commission after the resolution of a Texas Supreme Court case, City of Dallas v. Stewart - July 1, 2011, involving the process that cities use to order demolition of unsafe or substandard properties is now appropriate;

WHEREAS, city staff has contacted and confirmed the desire and willingness of the members who served on the commission prior to the Texas Supreme Court case and its resolution and one new appointee; and

WHEREAS, those members who are listed as follows: James Cook, a new appointee, and Eddie Coe, Dan Boyles, Myron Stringer, and Betty Williams, who all have previously served on this commission, shall be appointed to current one-year terms and two-year terms from the effective date of this resolution;

NOW, THEREFORE BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF TEXARKANA, TEXAS:

SECTION 1: That the Building and Standards Commission is hereby confirmed and reestablished to current status to carry out the purpose and duties for which it was created.

SECTION 2: That James Cook, a new appointee, and Eddie Coe, Dan Boyles, Myron Stringer, and Betty Williams, who served on the commission prior to the Texas Supreme Court case, be appointed to current one (1) year terms and current two (2) year terms.

SECTION 3: That this Resolution shall be in full force and effect from and after its passage and approval.

PASSED AND APPROVED in Regular Council Session on this the 10th day of November, 2014.

Briefing Sheet

Lead Department: Planning and Community Development **Action Officer:** David Orr, Administrative Services Manager

Subject: The Public Comment Hearing will be held on November 24th for the 2013 Community Development Block Grant (CDBG) annual Comprehensive Assessment Performance Evaluation Report (CAPER). The 15 day public comment period will be held from November 19th to December 3rd. The U.S. Department of Housing and Urban Development - Community Planning Department requires each Community Development Block Grant (CDBG) Entitlement Community to complete an annual Comprehensive Assessment Performance Evaluation Report (CAPER) no later than 90 days after the close of the program year (program year-end date: September 30, 2014; CAPER due date: December 29, 2014).

Updates/History of Briefing:

NOT APPLICABLE

Executive Summary and Background Information:

The City of Texarkana, Texas hereby gives notice that the DRAFT of the Community Development Block Grant 2013 Program Year Consolidated Annual Performance Evaluation Report (CAPER) will be available for public review and comment at the dates and times listed below. Spanish translation available upon request. The Department of Housing and Urban Development requires all recipients of Community development Block Grant funds to submit an annual report. All interested persons or groups are encouraged to review the DRAFT CAPER and formally present their comments for inclusion in this report.

The DRAFT report can be reviewed at the following location during regular business hours between November 19, 2014 and December 3, 2014:

Texarkana, Texas City Hall
 Department Planning and Community Development
 220 Texas Boulevard
 Texarkana, Texas

The DRAFT CAPER is also available on the Texarkana, Texas website – www.ci.texarkana.tx.us.

The City will hold a regularly scheduled City Council Meeting, which is a Public Meeting, on November 10, 2014 where the public and Council will be briefed on the report and comment period.

The Public Hearing for the CAPER will occur at the regularly scheduled City Council Meeting on November 24, 2014. The 15 day Comment period will end on November 19, 2014. Citizens are asked to present their comments at this Public Hearing for inclusion in the report or to submit written

City of Texarkana, Texas

comments for inclusion in the report to the Department of Planning and Community Development, City of Texarkana, Texas 220 Texas Boulevard, P.O. Box 1967, Texarkana, Texas 75504. Comments may be mailed or delivered to this office by 5:00 p.m. December 3, 2014.

The City Council will be asked to approve submission of the report at the regularly scheduled City Council Meeting, a Public Meeting, on December 8, 2014.

Lead Department: Planning and Community Development **Action Officer:** David Orr, Administrative Services Manager

Subject: Ordinance No. 2014-132 amending the Farmers Market Fund budget expenditures for the fiscal year ending September 30, 2015.

Briefing: 11/24/2014 **Public Hearing:** 11/24/2014 **Second Briefing:** December 8, 2014 **Council Vote:** 1/12/2015

Item Schedule

Schedule 1: Brief twice - vote once (six weeks)

Updates/History of Briefing:

NOT APPLICABLE

Executive Summary and Background Information:

The City of Texarkana, Texas, has received a \$93,746 grant from the USDA to help increase low-income participation in area farmers' markets. As a result, the following changes are requested to appropriate additional FY2015 Farmers Market Promotion funds to provide funding for items approved in the grant budget.

Farmers Market Promotion: 101-2007

	Account	Revised FY15
Maintenance Operations	51103	\$ 31,360
Advertising	54525	\$ 9,504
Major Tools & Equipment	55702	\$ 13,000
Farmers Market	57029	\$ 8,522.40

Personnel: Farm to Table Program Manager Total \$31,360 – This position will be essential to accomplishing the goals of the Texarkana Farm to Table Initiative. Specifically, the position will assist by overseeing the expansion of a young and growing farmers' market through producer to consumer marketing and promotion activities targeting low income communities. Additionally, this position will be responsible for introducing a new mobile farmers market, launching four additional market locations in partnership with the Texarkana, Texas Housing Authority to extend locally grown produce access into identified neighborhood food deserts, establishing community gardens for resident use and to increase urban farmer capacity. Finally, the position will oversee the development of a farm to table training program that includes farmer/vendor led workshops related to urban farmer entrepreneurial skills, food preparation,

City of Texarkana, Texas

value added processing, marketing and sales, healthy nutrition cooking series, direct marketing to local culinary arts programs and technical assistance.

Farm to Table Program Manager's salary was based on BLS Occupation Code 45-0000 Annual Median Wage for Texarkana, TX/AR MSA

Supplies: Total \$13,000

This supply cost correlates to the program by providing a vehicle for the new mobile farmers market and launching four additional market locations in partnership with the Texarkana, Texas Housing Authority to extend locally grown produce access into identified neighborhood food deserts, establishing community gardens for resident use and to increase urban farmer capacity.

Advertising Total: \$9,504

The advertising is necessary in order to expand a young and growing farmers' market through producer to consumer marketing and promotion activities targeting low income communities. Specifically it relates to increased advertising in historically low income communities utilizing marketing and outreach through minority oriented publications.

The advertising costs were based on historical advertising space estimates from each of the different forms of advertising media.

Farmers Market Indirect Costs: Total: \$8,522.40

The indirect costs will contribute to accomplishing all three goals in the Texarkana Farm to Table Initiative. Specifically, it will assist by providing administrative support and supervision for the project. This support will help in the expansion of a young and growing farmers' market through producer to consumer marketing and promotion activities targeting low income communities. It will also assist in introducing a new mobile farmers market, launching four additional market locations in partnership with the Texarkana, Texas Housing Authority to extend locally grown produce access into identified neighborhood food deserts, establishing community gardens for resident use and to increase urban farmer capacity. Finally, it will aid in the development of a farm to table training program that includes farmer/vendor led workshops related to urban farmer entrepreneurial skills, food preparation, value added processing, marketing and sales, healthy nutrition cooking series, direct marketing to local culinary arts programs and technical assistance.

Update Date: 11/19/2014 3:24 PM

Briefing Sheet

Lead Department: Public Works Department **Action Officer:** Kyle Dooley
Subject: Resolution No. 2014-125 naming the newly constructed street between Cowhorn Creek Road and Robin Lane to Galleria Oaks Drive and renaming Morris Lane between Robin Lane and Arista Boulevard to Galleria Oaks Drive.
Briefing: 12/8/2014 **Public Hearing:** 11/10/2014 **Second Briefing:** November 24, 2014 **Council Vote:** 12/8/2014

Item ScheduleSchedule 1: Brief twice - vote once (six weeks)**Updates/History of Briefing:**

The public hearing for this item was held on November 10th. Joy Krull, #5 Morris Lane, stated that she would rather not have the street name changed from Morris Lane to Galleria Oaks Drive. No other residents spoke at the public hearing.

Staff did receive one call prior to the public hearing. Mary Hayes, #11 Morris Lane, called to say that she wouldn't be able to make the public hearing but that she was in favor of the street name change. Staff also received an email after the public hearing from Carl Herberg in favor of the street name change. He owns Kingwood Forestry on Morris Lane.

Executive Summary and Background Information:

Construction is nearing completion on Phase II of the Morris Lane construction project. As part of this project a new section of street has been constructed between Cowhorn Creek Road and Robin Lane. As part of this project, Morris Lane has also been reconstructed between Robin Lane and Richmond Road. Once construction is complete, a roadway will exist from Arista Boulevard to Cowhorn Creek Road. The portion between Arista Boulevard and Robin Lane is currently named Morris Lane. The newly constructed portion of roadway between Robin Lane and Cowhorn Creek Road has not been named yet. Staff is proposing to change the name of the street between Arista Boulevard to Cowhorn Creek Road to Galleria Oaks Drive

Because of the proximity of Morris Lane to Moores Lane and both street names sound so much alike, staff feels that renaming Morris Lane to Galleria Oaks Drive would alleviate confusion. This would help eliminate potential problems for emergency personnel, delivery services and etc. Renaming this roadway would also provide for continuity as Council has previously renamed Morris Lane between Summerhill Road and Cowhorn Creek Road to Galleria Oaks Drive in early 2010.

There are 15 residential properties and 6 commercial properties that currently have a Morris Lane address. Should council approve the street name change, those current addresses

City of Texarkana, Texas

would change. Staff is sending letters out to each affected property owner that lets the owner know that Council is considering a street name change. It also invites them to the public hearing where they can provide input on this upcoming council decision.

Potential Options:

- Approve the resolution and rename Morris Lane to Galleria Oaks Drive.
- Do not approve the resolution and Morris Lane will continue with the current name.

Fiscal Implications:

Very Minimal, if approved. The only cost will be cost of new street name signs.

Staff Recommendation:

Staff recommends approving the resolution to rename Morris Lane to Galleria Oaks Drive.

RESOLUTION NO. 2014-125

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF TEXARKANA, TEXAS, NAMING THE NEWLY CONSTRUCTED STREET BETWEEN COWHORN CREEK ROAD AND ROBIN LANE TO GALLERIA OAKS DRIVE AND RENAMING MORRIS LANE BETWEEN ROBIN LANE AND ARISTA BOULEVARD TO GALLERIA OAKS DRIVE; AND ESTABLISHING AN EFFECTIVE DATE.

WHEREAS, the City of Texarkana, Texas, has recently completed construction on a new street between Cowhorn Creek Road and Robin Lane and has also reconstructed Morris Lane between Robin Lane and Richmond Road; and

WHEREAS, it is necessary to name the new street that has been constructed between Cowhorn Creek Road and Robin Lane;

WHEREAS, it is necessary to rename Morris Lane, between Robin Lane and Arista Boulevard, to alleviate possible street name confusion in the area to better serve the health and public safety of the City;

NOW, THEREFORE BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF TEXARKANA, TEXAS:

SECTION 1: That the name of the newly constructed street between Cowhorn Creek Drive and Robin Lane be officially named as **Galleria Oaks Drive**.

SECTION 2: That the name of the remaining section of Morris Lane, between Robin Lane and Arista Boulevard, be officially changed to **Galleria Oaks Drive**.

SECTION 3: That this change in names shall not become effective until thirty (30) days after the date of passage of this Resolution, so as to provide sufficient time for street sign changes, postal service adjustments, and business and personal address changes to be implemented by those affected by the change.

SECTION 4: That this Resolution shall be in full force and effect from and after its passage and approval.

PASSED AND APPROVED in Regular Council Session on this the 8th day of December, 2014.

Re: Proposed Morris Lane Street Name Change

Dear Resident,

The Texarkana, Texas City Council will consider a street name change for Morris Lane in the upcoming weeks. This name change is proposed for the portion of Morris Lane from Arista Boulevard to Robin Lane, and also for the newly constructed portion between Robin Lane and Cowhorn Creek Road. If approved, this street will be named Galleria Oaks Drive.

The proposal is an effort to alleviate confusion of the street names in this area between Morris Lane and Moores Lane. Since the streets names sound similar and are located in close proximity, potential problems exist for emergency personnel, delivery service, and general logistics

The City Council will hold a public hearing concerning this proposal at a regularly scheduled council meeting on November 10th, 2014 at 6:00 p.m. The meeting will be held at City Hall, 220 Texas Boulevard, in the City Council Chambers on the second floor. All residents are encouraged to attend the public hearing to provide input on this council decision.

If you have questions, or will not be able to attend the public hearing, please feel free to call me at (903) 798-3943 to discuss this proposal. You may also submit your feedback for council's deliberation by emailing me at kdooley@txkusa.org.

Sincerely,

Kyle Dooley, P.E.
Director of Public Works
City of Texarkana, Texas

TEX-Dooley, Kyle

From: Carl B. Herberg <cherberg@kingwoodforestry.com>
Sent: Monday, November 17, 2014 5:20 PM
To: TEX-Dooley, Kyle
Subject: Morris Ln name change

Kyle,

I know I missed the date for public comment period, but for what it's worth, I'm in favor of the name change. I know this will cause our company some considerable expense to signs, letterhead, publications, etc., but the name change makes sense since it is a straight shot across town, plus it is a more recognizable name than Morris.

Briefing Sheet

Lead Department: Finance Department **Action Officer:** Charlie Bassett, CFO
Subject: Resolution No. 2014-126 approving Bowie County Appraisal District's 2014 Tax Rolls.
Briefing: 12/8/2014 **Public Hearing:** 11/10/2014 **Second Briefing:** November 24, 2014 **Council Vote:** 12/8/2014

Item ScheduleSchedule 1: Brief twice - vote once (six weeks)**Updates/History of Briefing:**

NOT APPLICABLE

Executive Summary and Background Information:

Each year Bowie County Appraisal District prepares the City's Tax Rolls for approval by City Council. Exhibit A presents the City of Texarkana Tax roll, with a total taxable value of \$2,088,503,463, and a total tax levy of \$13,530,277.78, the T1 (TIRZ 1) Tax Roll, with a total taxable value of \$312,238,992, and a total tax levy of \$2,082,554.05, and the T2 (TIRZ 2) Tax Roll, with a total taxable value of \$58,050,587, and a total tax levy of \$387,433.82.

Potential Options:

- Approve the Tax Rolls as presented by Bowie County Appraisal District.
- Decline.

Fiscal Implications:

The City's tax rate of 0.669293 per \$100 is applied to the total taxable value of each tax roll to determine the property tax revenue that will be collected by the City to fund the City's budgeted expenditures for the fiscal year ending September 30, 2015.

Updates/History of Briefing:

NOT APPLICABLE

Executive Summary and Background Information:

LOAN PROGRAM: Façade RLF
 POTENTIAL BORROWER: Thomas F Morrissey.
 Veteran Guitar
 Objective: Improvements to Broad @ Main Street property
 Loan Request: \$50,000
 Loan Approval: \$50,000 for 10 years @ Bank rate + 2%
 Sources of funds: Economic Development Fund
 Collateral: Real Estate, personal guaranty
 Type of Project: Improvements to commercial property that has been vacant for several years.
 Jobs: 3- 7new
 Narrative:

This loan will be used for improvements to property on Broad @ Main Street near the Perot Theater and Pecan Point in downtown Texarkana that has been used as retail space, a religious organization, and as the Mabel Morris Women's Center.

The location is within the target area for the Façade RLF. The borrower's financial statements indicate an ability to repay the loan if the operation does not produce adequate cash flow.

There are about 20 windows on the second floor of the property are boarded. These will be replaced. Other façade restoration will include repairs to brick and mortar.

Potential Options:

- Approve loan request
- Deny loan request

City of Texarkana, Texas

Fiscal Implications:

\$50,000 from Economic Development included in FY 15 budget

*City of Texarkana
Façade Revolving Loan Fund*

LOAN PROGRAM:	Façade RLF
POTENTIAL BORROWER:	Thomas F Morrissey. Veteran Guitar
Objective:	Improvements to Broad @ Main Street property
Loan Request	\$50,000
Loan Approval:	\$50,000 for 10 years @ Bank rate + 2%
Sources of funds:	Economic Development Fund
Collateral:	Real Estate, personal guaranty
Type of Project:	Improvements to commercial property that has been vacant for several years.
Jobs:	3- 7new

Narrative:

This loan will be used for improvements to property on Broad @ Main Street near the Perot Theater and Pecan Point in downtown Texarkana that has been used as retail space, a religious organization, and as the Mabel Morriss Women's Center.

The location is within the target area for the Façade RLF. The borrower's financial statements indicate an ability to repay the loan if the operation does not produce adequate cash flow.

There are about 20 windows on the second floor of the property are boarded. These will be replaced. Other façade restoration will include repairs to brick and mortar.

VETERAN GUITAR

The only stringed instruments made to honor this nation's veterans, active duty military, and their families by creating heirloom quality, personalized instruments specifically embellished to recognize any veteran's sacrifices and accomplishments and for the discerning individual who wants the highest quality and unique instruments available handmade in the USA

Only the finest hardwoods and materials go into each personalized instrument created

RESOLUTION NO. 2014 - 127

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF TEXARKANA, TEXAS, APPROVING THE FUNDING OF A LOAN FROM THE FAÇADE REVOLVING LOAN FUND PROGRAM WITH FUNDS FROM THE ECONOMIC DEVELOPMENT FUND; AUTHORIZING THE CITY MANAGER TO EXECUTE LOAN DOCUMENTS ON BEHALF OF THE CITY; AND ESTABLISHING AN EFFECTIVE DATE.

WHEREAS, by Resolution No. 64-2013, the City Council established a Façade/Landscape Revolving Loan Fund (FLRLF) for owner occupied/owner operated businesses in the Texarkana, Texas Downtown Gateway, Scenic, and Historic Special Design Districts and the Downtown TIRZ (TIRZ #2) District for the purpose of restoring or improving façades and landscaping; and

WHEREAS, the Façade/Landscape Revolving Loan Fund (FLRLF) will be capitalized with Economic Development funds on an annual basis in an amount not to exceed FIFTY THOUSAND AND NO/100 DOLLARS (\$50,000.00) annually; and

WHEREAS, the Façade/Landscape Revolving Loan Fund Committee will provide the administration of such revolving loan program to determine qualification and availability of funds; and

WHEREAS, the Façade Revolving Loan committee has recommended the potential funding of a loan for construction of façade improvements by Thomas Morrissey in an amount not to exceed \$50,000; and

WHEREAS, the City Council recognizes the need for funding of projects to preserve structures and further economic development as evidenced by their creation and approval of the Façade Revolving Loan policy with Ordinance No. 064-2013.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF TEXARKANA, TEXAS:

SECTION 1: The City Council of the City of Texarkana, Texas approves funding a loan from the Façade Revolving Loan Fund to Thomas Morrissey in an amount not to exceed FIFTY THOUSAND AND NO/100 DOLLARS (\$50,000.00) with collateral of a subsidiary lien on real estate and the personal guaranty of Thomas Morrissey.

SECTION 2: The City Council of the City of Texarkana, Texas authorizes the City Manager to execute loan documents for the Façade Revolving Loan Fund on behalf of the City in an amount not to exceed FIFTY THOUSAND AND NO/100 DOLLARS (\$50,000.00).

SECTION 3: That this Resolution shall be in full force and effect from and after its passage and approval.

PASSED AND APPROVED in Regular Council Session on this the 8th day of December, 2014.

Briefing Sheet

Lead Department: Planning and Community Development **Action Officer:** Debbie Burk
Ordinance No. 2014-128 granting a Specific Use Permit to allow the one additional use of outdoor display and sale of new and used boats on Lot 2, Block 1, Richmond Pavilion Addition, located at 3911 Mall Drive. Gregg Orr, owner. Kayla Wood, MTG Engineering & Surveying, agent. (A 3/4 vote will be required of the City Council to approve this request due to a petition in opposition.)

Subject: Public

Briefing: 11/10/2014 **Hearing:** 11/10/2014 **Second Briefing:** November 24, 2014 **Council Vote:** 12/8/2014

Item ScheduleSchedule 1: Brief twice - vote once (six weeks)**Updates/History of Briefing:**

Not applicable.

Executive Summary and Background Information:

S-657: This is a request by Gregg Orr, under contract to purchase, and Kayla Wood, MTG Engineering, agent, for a Specific Use Permit, SUP, to allow the one additional use of "outdoor display and sales of new or used boats" on Lot 2, Block 1, Richmond West Pavilion Addition, located at 3911 Mall Drive. The property is currently undeveloped vacant land.

The adjacent zoning is PD-General Retail to the east and west, Single Family-2 to the south and I-30 to the north. The adjacent land usage is Cavender's Boot Store to the east, vacant land to the south, the corporate office and parking lot area for Gregg Orr Auto Classic to the west, and I-30 to the north.

The Comprehensive Plan has designated this as a retail area. This property is zoned General Retail. A Specific Use Permit is required by Section 8-108 of the Zoning Ordinance to allow the one additional use of "outdoor display and sales of new and used boats" in the General Retail zoning district.

Since this property is located in a Planned Development District, a site plan must be submitted and approved by the Planning and Zoning Commission and City Council as a separate submission in the future and prior to construction. For purposes of consideration of the Specific Use Permit, a conceptual design has been attached for your review.

This tract of land has access from Mall Drive (one way frontage road along I-30) and is near Richmond Road. Mall Drive currently has the location of Gregg Orr's Auto Mall just south of this property. This corridor has various retail and department stores, restaurants, banks and a grocery store.

It should be noted that a screening device will be required along the south property line where this property abuts a residential zoning district.

Prior to the Planning and Zoning Commission meeting, a petition in opposition to this request was received from Mr. William T. Adams who owns more than 20% of the land within 200' of this

City of Texarkana, Texas

proposed change. Due to the petition a ¾ vote will be required by the City Council to approve this request.

All notification and applicant requirements have been met to consider this request.

Potential Options:

Approve or deny Ordinance for boat sales at 3911 Mall Drive.

Fiscal Implications:

None

Staff Recommendation:

Staff recommends for approval of this request since this use is consistent with other uses in this area of

Advisory Board/Committee Review:

Item was heard at the October 6, 2014 Planning and Zoning Commission meeting.

Board/Committee Recommendation:

The Planning and Zoning Commission unanimously recommended for approval.

Advisory Board/Committee Meeting Date and Minutes:

ORDINANCE NO. 2014-128

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF TEXARKANA, TEXAS, AMENDING THE ZONING MAP SHOWING THE LOCATION, BOUNDARY AND USE OF CERTAIN PROPERTY BY THE GRANTING OF SPECIFIC USE PERMIT NO. S-657 TO ALLOW THE ONE ADDITIONAL USE OF OUTDOOR DISPLAY AND SALE OF NEW AND USED BOATS ON LOT 2, BLOCK 1, RICHMOND WEST PAVILION ADDITION, LOCATED AT 3911 MALL DRIVE, IN THE CITY OF TEXARKANA, BOWIE COUNTY, TEXAS; CONTAINING A REPEALER CLAUSE; CONTAINING A SEVERABILITY CLAUSE; AND ESTABLISHING AN EFFECTIVE DATE.

WHEREAS, an application has been filed with the City of Texarkana, Texas, requesting an Amendment to the Zoning Ordinance so as to grant a **Specific Use Permit** to allow the **one additional use of outdoor display and sale of new and used boats** on Lots 2, Block 1, Richmond West Pavilion Addition, located at 3911 Mall Drive, in the City of Texarkana, Bowie County, Texas; and

WHEREAS, the Planning and Zoning Commission of the City of Texarkana, Texas and the City Council of the City of Texarkana, Texas, in compliance with the laws of the State of Texas with reference to the granting of zoning classifications and changes, have given the requisite notices by publication and otherwise, and after holding hearings and affording a full and fair hearing to all property owners generally and to all persons interested and situated in the affected area and in the vicinity thereof; and

WHEREAS, after consideration of said application, the Planning and Zoning Commission of the City of Texarkana, Texas, voted **unanimously five (5) to Zero (0) to recommend** to the City Council of Texarkana, Texas, that a **Specific Use Permit be granted to allow the one additional use of outdoor display and sale of new and used boats** on said property; and

WHEREAS, after consideration of said application and the recommendation of the Planning and Zoning Commission, the City Council of the City of Texarkana, Texas, does hereby find that granting the **Specific Use Permit** is in the best interest of the public health, safety, morals and general welfare of the City;

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF TEXARKANA, TEXAS:

SECTION 1: That the Zoning Ordinance of the City of Texarkana, Texas, Ordinance No. 127-70, passed and approved on September 14, 1970, be further amended so as to grant **Specific Use Permit numbered S-657 for the purpose of allowing the one additional use of outdoor display and sale of new and used boats** on the following described property, to-wit: **Lot 2, Block 1, Richmond West Pavilion Addition, located at 3911 Mall Drive in the City of Texarkana, Bowie County, Texas.**

SECTION 2: All ordinances or parts of ordinances in conflict herewith are specifically repealed to the extent of such conflict.

SECTION 3: It is further provided that in case a section, clause, sentence or part of this Ordinance shall be deemed or adjudged by a court of competent jurisdiction to be invalid, then such invalidity shall not affect, impair, or invalidate the remainder of this Ordinance.

Attachment: Ordinance No. 2014-128 (1210 : Ord. No. 12014-128 S-657:: SUP for boat sales at 3911 Mall Drive)

SECTION 4: That this Ordinance shall be in full force and effect from and after its passage and approval.

PASSED AND APPROVED in regular Council Session on this the **8th day of December, 2014.**

RE: CASE S-657

October 6, 2014

This Petition is filed in response to the proposed Planning & Zoning Commission hearing October 6, 2014 and City Council hearing November 10, 2014 in Texarkana, Texas; specifically regarding Gregg Orr's proposed rezoning of the property at 3911 Mall Drive, Texarkana, Texas for a " Specific Use Permit to allow boat sales with outdoor display", property located on Lot 2, Block 1, Richmond West pavilion Addition.

As the designated Owner of the land immediately south of this tract (PD-97-4), a tract which exceeds 20% of the land within 200 feet of the proposed change, I DO OBJECT to this proposed use, as this proposed signage and non-pedestrian use will be inconsistent with the nearby existing family oriented retail and both existing and currently planned residential uses and roadway plans in the area. As such, it is not the highest and best use for this critical remaining tract fronting the I-30 access road , and will be a detriment to further development plans for the area.

Also, for the record, Mr Orr through an intermediary has proposed to purchase several acres of land from us to make this proposed "boat sales operation" viable, and we do not intend to pursue this transaction, as we believe further development in this overall area needs to be pursued more comprehensively – allowing the City to pursue plans that better serve nearby pedestrian-oriented retail and residential uses.

Briefing Sheet

Lead Department: Police **Action Officer:** Michael Henry, Captain
Resolution No. 2014-131 authorizing the City Manager to enter into a municipal
lease-purchase agreement with Motorola Solutions for the purchase and
installation of a public safety communications system, to include a computer
aided dispatch system and a records management system, through an interlocal
agreement with Houston-Galveston Area Council (HGAC) in a total amount not
to exceed NINE MILLION AND NO/100 DOLLARS (\$9,000,000) and
authorizing discontinuance of appropriations for purchasing, leasing, operating,
or maintaining the current public safety radio and computer aided dispatching
system.

Subject:

Briefing: 12/8/2014 **Public Hearing:** 11/10/2014 **Second Briefing:** November 24, 2014 **Council Vote:** 12/8/2014

Item Schedule

Schedule 1: Brief twice - vote once (six weeks)

Updates/History of Briefing:

Added email containing HGAC questions raised by Mr. Miller and response from Mr. Whitson.
 Added email from Mr. Steve Ledwell offering alternatives to purchasing Motorola radio system.
 Added email containing questions from Mr. Miller and responses from Capt. Henry.
 Added answers to questions received during Public Hearing.
 Added email from Chief Shiner detailing meeting with Chief Harrison.
 Added list detailing ongoing CAD issues.
 Added list of Texas Motorola customers using HGAC.
 Added copy of Power Point presentation for 2nd briefing.

Executive Summary and Background Information:

The public safety communications system for Texarkana/Bowie County is over fifteen years old and the need for replacement has reached the critical stage. Each passing day brings us closer to a complete system failure. Failure would mean the loss of communications for law enforcement, the fire department, public works, and the water department. It would also seriously hamper communications with outside agencies, such as emergency medical services and neighboring jurisdictions.

Many of the components are no longer supported in the event of failure. It cannot take advantage of the advances in technology that a new digital system can provide. Interoperability with other public safety agencies and growth for additional users is limited. It does not adequately cover Bowie County, leaving the Sheriff's Office with little radio contact in many areas of the county. If our police or fire department responds outside of the city to

City of Texarkana, Texas

render mutual aid, then we would be left with poor or no radio communications. Improved and expanded coverage of the system is crucial.

The current Computer Aided Dispatch system was purchased approximately a year and a half ago. It has been plagued by numerous problems and the vendor, Tyler Public Safety, has not been able to resolve all of the issues. The system deficiencies affect both the police and fire departments and place the safety of our citizens at risk. The system was purchased on a three year plan in which the first year has been paid. It is recommended that a new CAD system be purchased, the city funding for the remaining two payments be unappropriated and the relationship with Tyler Public Safety be severed.

The police department has been using a Records Management System purchased by Bowie County a few years ago. The system was not designed for a municipal police department and does not adequately fit our needs. It does not integrate well with the City Court. It has inadequate property management. It has no alarm permit application. It has no Investigations Case Management. The lack of a proper RMS has hampered the department's efforts to move towards a paperless system.

Motorola is the provider of the current radio system and was used by the City for many years even prior to that acquisition. They have local repair technicians who have provided prompt and excellent service when the need has arisen. Motorola Solutions has an in depth knowledge of our needs and have had engineers on location to analyze our requirements. They have stated that they could begin work on replacing the network by the end of the year. When considering the critical need for immediate replacement, Motorola is in position to best fill that need.

Motorola also offers a CAD and RMS system that will fit the needs of both the police and fire departments.

Motorola Solutions has submitted bids to provide communications systems and services through Houston/Galveston Area Council of Governments Cooperative Purchasing Program, HGAC Buy. Contracting through HGAC is compliant with Texas state statutes for competitive bidding. . Motorola has submitted negotiated pricing discounts that go below HGAC pricing and that include significant incentives for purchase prior to the end of the year.

Potential Options:

- Approve the resolution as presented
- Amend the presented resolution and adopt the amended resolution • Disapprove the resolution as presented or amended

Fiscal Implications:

The cost of the communications system, the computer aided dispatch system and the records

City of Texarkana, Texas

management system will not exceed \$9,000,000.00. It is proposed that the City enter into a lease-purchase agreement for a fifteen year period with the first two years deferred.

The attached "Bowie County-Wide Texarkana, Texas P-25 Public Safety Radio System" financing plan shows the projection of public funds outlays and the relation of the outlays to potential maximum property tax rates. Three projections are presented using three combinations of financing variables.

The first projection is the worst case scenario of \$9 million costs and a 4% financing cost. The highest related property tax rate is projected to be 4.2¢ per \$100 property valuation.

The second projection is a slightly better scenario of \$9 million costs and a 3.5% financing cost. At this interest rate the highest related property tax rate is projected to be 4.08¢ per \$100 property valuation.

The third projection is again a slightly better scenario of \$8.5 million costs and a 3.7% financing cost. At this cost and interest rate the highest related property tax rate is projected to be 3.93¢ per \$100 property valuation.

Once the system is in place and fully operational other agencies throughout the county will have the opportunity to use the system. A fee schedule will be developed and recommended wherein users will pay fees related to usage of the system. The fee schedule will likely be a per radio call basis. These revenues will relieve some of the strain on the property tax rate. Therefore staff believes the projected worst-case scenarios tax rates will not fully materialize.

Staff Recommendation:

Purchase of these systems is recommended by both the Police and Fire Departments.

RESOLUTION NO. 2014-131

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF TEXARKANA, TEXAS, AUTHORIZING THE CITY MANAGER TO ENTER INTO AGREEMENTS FOR A TOTAL AMOUNT NOT TO EXCEED NINE MILLION AND NO/100 DOLLARS (\$9,000,000.00) FOR THE PURCHASE AND INSTALLATION OF A PUBLIC SAFETY COMMUNICATIONS SYSTEM AND CONDITIONAL PURCHASE AND INSTALLATION OF A COMPUTER AIDED DISPATCH SYSTEM AND A RECORDS MANAGEMENT SYSTEM FROM MOTOROLA SOLUTIONS, INC.; CONDITIONALLY AUTHORIZING DISCONTINUANCE OF APPROPRIATIONS FOR PURCHASING, LEASING, OPERATING, OR MAINTAINING THE CURRENT PUBLIC SAFETY COMPUTER AIDED DISPATCHING AND RECORDS MANAGEMENT SYSTEM; AND ESTABLISHING AN EFFECTIVE DATE.

WHEREAS, the City Council of the City of Texarkana, Texas, recognizes that the current public safety radio system has exceeded its end of life cycle, that parts and future support for the current system are nearly nonexistent, and that replacement of the system is critical; and

WHEREAS, the City Council also recognizes that the current public safety computer aided dispatching and records management system lacks the capacity to meet the immediate needs of the entities it supports, and the citizens they provide emergency services to; and

WHEREAS, the reliability of these systems is an absolute necessity and in the best interest of the safety, health and welfare of the citizens; and

WHEREAS, Houston-Galveston Area Council ("H-GAC") and Motorola Solutions, Inc., entered into a contract dated as of May 25, 2012 (the "H-GAC Contract") identified as RA05-12.13, which provided that defined End Users such as Texarkana may purchase radio communications equipment from Motorola through the Houston-Galveston Area Council (H-GAC) Cooperative Purchasing Program pursuant to Chapter 271, Subchapter F of the Texas Local Government Code, and that such purchases through the H-GAC contract comply with Texas competitive purchasing laws ["A local government that purchases goods or services under this subchapter satisfies any state law requiring the local government to seek competitive bids for the purchase of the goods or services." Tex. Loc. Gov't Code § 271.102(c)]; and

WHEREAS, pursuant to the H-GAC Contract, this equipment is available through the City's membership in the H-GAC Cooperative Purchasing Program at a substantial savings, and Motorola and the City of Texarkana, Texas now wish to enter into agreements that delineate the specific terms of purchasing radio communications equipment and systems from Motorola with the option of also purchasing other discounted equipment and services, including computer aided dispatching and records management systems; and

WHEREAS, Motorola has submitted a price for these systems, with lease-purchase financing available from Motorola for a term of fifteen years with annual payments, with the first two years deferred, in an aggregate amount not to exceed NINE MILLION AND NO/100 DOLLARS (\$9,000,000.00).

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF TEXARKANA, TEXAS:

SECTION 1: That the City Council approves the purchase through the H-GAC Contract of a Public Safety Communications System from Motorola Solutions, Inc., and approves the conditional purchase through the H-GAC Contract of a Computer Aided Dispatch System and a Records Management System from Motorola Solutions, Inc., in an amount not to exceed Nine Million Dollars (\$9,000,000.00).

SECTION 2: That the City Manager be and is hereby authorized to enter into agreements, including financing agreements, with Motorola Solutions, Inc., consistent with the provisions of the H-GAC Contract and H-GAC Cooperative Purchasing Program, for the purchase of a radio / simulcast project system including fixed network equipment infrastructure, dispatch center equipment, and subscriber equipment and accessories.

SECTION 3: That the City Manager be and is hereby authorized to enter into agreements, including financing agreements, with Motorola Solutions, Inc., consistent with the provisions of the H-GAC Contract and H-GAC Cooperative Purchasing Program, for the purchase of a Computer Aided Dispatch System and a Records Management System with associated services, conditioned upon the City Manager determining that purchase of the system is in the best interest of the safety and welfare of the citizens and their property; and, upon installation and system acceptance, the City Council authorizes discontinuing appropriations for purchasing, leasing, operating, or maintaining the current computer aided dispatching and record management systems.

SECTION 4: That this Resolution shall be in full force and effect from and after its passage and approval.

PASSED AND APPROVED in Regular Council Session on this the 8th day of December, 2014.

Integrated Command Vision

Today's Command Center Challenge

- Multiple discrete platforms
- Operational, performance and cost impact

Integrated Command Center

- Each with unique user interface
- Requiring its own consoles
- Separate authentication and sign-on
- Multiple geocoding systems
- Individual storage solutions
- No standardization of interfaces
- Unique, isolated mapping

- **Common user interface**
- **Unified storage & data model**
- **Fully correlated CAD, voice & video**
- **Common geocoding, time & date stamps**
- **Single sign-on authentication**
- **Common, interactive map**
- **Flexible, scalable platform**

...Driving the need for integration

Common platform allow s evolution & integration

REF: CAD Issues
DATE: 10/22/2014

We have experienced several issues with the Tyler Public Safety CAD system since going live in March 2013. In 2012 we were notified by Tyler that our previous CAD system would not work with the new Odyssey system without a complete system overhaul. This, combined with several other issues, led us to search for a new CAD system. With limited time, we reviewed three different CAD vendors and ultimately picked Tyler based off of compatibility, price, and their assurances that the product would work in our environment.

From go-live to present day, we have experienced many issues directly related to the products inability to remain stable at our call volume level and with dispatch configuration.

Yesterday, Tyler installed a recently created patch that is supposed to address some of the issues noted below. However, as these recurring issues do not occur consistently it will likely be several weeks before we can determine if the listed issues marked "Under Review" have been resolved. Although, we do already know that the patch did not remedy the disappearing call comments issue as it occurred several times yesterday evening after the patch. We also know that ACIC is still not functioning in the mobiles as well.

- **Automatic Mutual Aid Response** – Despite many implementation hours dedicated towards mutual aid, Tyler was unable to make it work. We may have a solution to work around this deficiency but it requires rebuilding a good portion of the unit allocation.
- **Disappearing Calls** – In a recent development, open calls have disappeared while the system was under heavy call load. Once we hit 60 open calls dispatch noticed calls missing.
- **Comments Missing** – Comments that were entered into a call sometimes disappear.
- **Multiple Unit Assignments to the Same Call (Under Review)** – If two dispatchers add units to a call at the same time only some of units are successfully assigned. For example, if you have five fire trucks being assigned to a call by one dispatch and another dispatcher adds a police unit, the fire units do not get placed on the call. This affects safety, accountability, and response time.
- **LETs Issues (State Returns)** – The CAD system lacks the capability to perform State lookups from both the Arkansas and Texas system. Tyler has confirmed that it will not work in Dispatch, but has taken steps to make it work in the mobiles. We recently attempted to bring both systems online and it still did not work and exhibited the same problems we had at Go-live.

Attachment: CAD Issues - CRC (1212 : Res. No. 2014-131 Public Safety Radio System)

- **Warrant Issues** – Part of the integration with Tyler products was the ability for Officers and Dispatch to use one product to perform warrant lookups. This was to be accomplished using a product called “Combined Search” and in the future a new product called “One Search”. We have never implemented Combined Search in production, because it does not consistently returns all the active warrants we have in our systems. We have reported the issue several times and after each fix that has been released it still fails our QA testing. The new product One Search has been delayed with no concrete release date. Currently Dispatch has to check three different systems in order to verify a person’s warrant status. This increased the amount of time an officer has to wait for information while on a traffic stop.
- **Unit Allocation (Under Review)** – We have several examples where everything was correct on our end but CAD did not recommend a proper response. You can put a test call in after the miss-allocation and it provides the correct response. This has resulted in fire units that were further way being sent when there were available units closer to the area. Although this was manually corrected when possible, there were times we didn’t catch it until units were already enroute.
- **Unit Allocation (Under Review)** – We have several examples where the CAD system recommends the correct units, makes them unavailable, but fails to place the units on the call. When this occurs the dispatcher has to manually make the units available again and re-perform the unit allocation steps.
- **Wrecker rotation** – The system does not reliably rotate through wreckers. After several updates and attempts to implement, we have moved back to an old system we had in place for tracking rotations.
- **Stability and Setup (Under Review)** – The CAD system is not stable at higher call loads. While it has gotten better, we still experience erratic behavior when the calls increase. We also experience sluggish response from the system in the dispatch and mobile client.
 - Units not being placed on call when doing unit allocation
 - Dispatchers cannot assign units to a call at the same time without there being an issue
 - Units not being placed on traffic stops – Call is entered as pending and
 - 3 to 4 tries to place unit on call
 - Units being shown available and queued to calls at the same time
 - Chat, mapping, and unit filtering does not work for some users
 - Screen refresh causes units to be placed on wrong calls, incorrect case numbers to be assigned
 - When call volume increases, dispatch frequently receives the message, “loading records please wait.”
 - When dispatchers are trying to place units on the same call, at the same time (fire and PD for example) they receive this message, “Another user has already merged this record.” This occurs even though it is two different dispatchers, units, and consoles.
- **Mobile Cad Issues** - Caller phone number and name do not show up in mobile CAD. To work around this Dispatch manually adds the information to the call notes so the officer in the field will have access to it.

There are several other less critical issues not noted in this memo, but this does cover the major issues we have been working with Tyler to resolve. To Tyler's credit, their support staff and developers have worked hard to improve the product based off our issues and feedback and have improved the product from where it was when we first went live. Unfortunately, there are still critical issues, including officer safety and liability incurring problems, which remain. We have also noticed a lack of quality assurance where the patches intended to fix some issues create issues in other areas. Furthermore, we have also noticed Tyler continues to add some enhancements that benefit their smaller client agencies, the bulk of their customer base, have caused problems for us with our size and call volume.

FROM: Ryan Durham, Information Services Manager – CRC

REF: RMS Issues

DATE: 10/22/2013

In 2000 the International Association of Chiefs of Police (IACP) performed an efficiency study on Central Records. In this study they concluded:

“The current RMS, part of a larger county and court system, is not well positioned to satisfy agency needs. The law enforcement module suffers from key deficiencies that make it difficult to adequately meet the future needs of BIC’s clients”

The records management system (RMS) the report refers to is Tyler TSG which is the precursor to Tyler Odyssey. The Tyler Odyssey system, in most respects, is an updated clone of TSG and suffers the same deficiencies as its predecessor.

While TTPD is progressive operationally and administratively, it has fallen behind from a technological perspective. Many of the current manual processes have been in place since the early 1990’s and are inefficient by today’s standard. The reliance on the county provided software, while cost effective from a budgetary standpoint, has created many inefficient manual processes. These processes create soft costs that impact work efficiency, increase errors, and hinder the ability to gather actionable information in a timely manner. All manual paperwork driven processes could and should be automated through a municipal oriented RMS system with the necessary interfaces created to eliminate duplicate entry. Although these issues evolved over time, they have become more critical as demand for services have increased and budgets have decreased.

After reviewing several municipal RMS products, I have determined that Odyssey lacks the following functionality that is common with municipal RMS packages:

- **Alarm Permit Tracking/Billing** – Odyssey does not have a module track alarm permits. Currently TTPD uses an in house system that is not available for officers in the field. Having this functionality would be a valuable resource in the field and reduce the time spent search for owner contact information.
- **CID Case Management** – Odyssey does not have the ability to efficiently track cases that are managed by CID. Solvability, classification, case work load, case status, assignment, and general management are not available in Odyssey. Currently, case management is handled manually via a paper trail.

Attachment: RMS_Review CRC (1212 : Res. No. 2014-131 Public Safety Radio System)

- **Property Management** – Odyssey does have the ability to log property into the system but does not have sufficient means to track location/status. It also lacks basic and chain of custody reporting required to efficiently manage property.
- **Citations** – Odyssey does not have a module for citations. TTPD currently writes paper tickets which are then manually entered into the court system. Once entered, the PD no longer has access to those tickets and has to request information on final disposition (outcome) from the court.
- **Use of force management** – Odyssey lacks the ability to track use of force statistics. TTPD currently uses a 3rd party system.
- **Intelligence tracking** – The system is not capable of tracking or searching information that could be valuable to law enforcement.
- **Sex Offender Registration** – Odyssey has the ability to note whether a person is a sex offender but does not provide a way to determine level of risk or the original conviction that led to sex offender registration.
- **Racial Profiling Reports** – Odyssey does not provide reporting for racial profile statistics. These reports are required by the State of Texas and are currently tabulated manually. This is inefficient and time consuming, leaving opportunity for serious error.
- **Impound Tracking** – Odyssey does not have a method to track impounds. TPS CAD has the ability track impounds through the wrecker module. However, the wrecker module does not function properly and Tyler thus far has been unable to resolve this issue. Impounds are currently tracked using an in house system.
- **Reporting** – Odyssey does an acceptable job gathering information but lacks statistical analysis and reporting that would be beneficial for an agency the size of TTPD. Currently most reporting is generated manually and there is a time delay in getting much needed statistical information.

In conclusion, I recommend the TTPD move forward with much needed modernization and take advantage of discounts available by combining the CAD/RMS purchase with the current radio project. Doing so will greatly increase efficiency and situational awareness of TTPD.

Texarkana, Texas Fire Department

October 23, 2014

RE: Resolution #2014-131

The two-way radio system is the primary communications platform for the fire department. The radio system serves two vital roles within the fire department. First, the radio system serves as the primary means for dispatching resources to an emergency. Second, other than face to face communication, two-way radios are the only means of communication between units while responding to and operating at emergency scenes.

The Texarkana, Texas Fire Department relies on the Bi-State Central Records and Communications department (CRC) for dispatching services. CRC utilizes an existing radio system that has far exceeded its expected life expectancy. The radio system has experienced failures in the past and in particular one recent failure severely impaired the fire departments ability to communicate. During this failure we experienced increased response times and were forced to operate on emergency scenes with an extremely limited ability to communicate. This failure clearly presented a safety threat to the public as well as responders.

In addition to the radio system the fire department is highly dependent on the Computer Aided Dispatching system (CAD). The CAD system is a software package that aids dispatchers in allocating appropriate resources to a call for service based on a predetermined protocol. The current CAD system, while new in comparison to the aging radio system, has experienced several failures and has limitations which impede the efficient delivery of emergency services.

Another advantage of the proposed new radio system is the integration of a fire station alerting system. Currently, the fire department is operating with a system that is not designed to alert fire stations, has no redundancy, and is limited in functionality. The alerting system in use today was put in place when our previous toning system failed and could not be repaired. The implementation of the proposed fire station alerting system would far exceed the abilities of the current system and would provide a stable platform going into the future.

The existing fleet of portable and mobile radios in use today in the fire department is comprised of several different brands with several different ages with the newest radio being approximately 8 years old. The aging fleet coupled with the assortment of models creates issues within in the department. The replacement of the portable and mobile radios would provide standardization of equipment and also refresh an aging fleet of radios.

THE RIGHT CHOICE FOR TODAY IS THE SMART CHOICE FOR TOMORROW ASTRO® 25 SYSTEMS

WHEN LIVES ARE AT STAKE.

RELY ON THE SYSTEM TRUSTED BY OVER A MILLION FIRST RESPONDERS EVERYDAY.

Around the world men and women, who protect our communities, put their lives at risk to make our lives safe. Whether running into a burning building, pursuing a speeding car or knocking on the door of a domestic disturbance, they need the confidence that there is a system behind them that will provide the help needed.

With over 750 ASTRO 25 systems and thousands of conventional sites, two million users rely on a Motorola radio for daily communications as well as emergency response in the most demanding situations.

With uncompromising real-world performance and legendary Motorola reliability, the ASTRO 25 solution continues to evolve, adding practical innovations and performance-driven capabilities that enable public safety agencies to protect the communities they work in and support neighboring communities through interoperability.

IMMEDIATE AND ASSURED VOICE IN AN EMERGENCY

Because critical incidents often require a large number of first responders, the radio system must have the capacity to handle heavy call volumes. Public safety agencies need to know their voice communications will not have to compete with consumers or other non-mission critical data traffic. The ASTRO 25 system is a dedicated communication system that can help ensure voice and data services will be available in times of emergency and peak demand. With the ability to allocate channels between voice and data as needed, ASTRO 25 supports more users, more calls and more information on the same spectrum.

ACCESSIBILITY IN CHALLENGING ENVIRONMENTS

When an officer is dispatched, he needs to be prepared and that includes his communications. Environments such as tunnels, high rise buildings and sub-basements can create unique challenges for wireless communications. An ASTRO 25 system has been optimized for the most challenging urban environments. Our field engineering team can design a system to meet your coverage requirements with solutions such as simulcast sites to minimize interference in specific environments, helping to ensure that calls get through.

RELIABLE VOICE AND DATA INTEGRATED AS ONE

Optimized for the rigorous demands of public safety agencies, ASTRO 25 provides reliable, always available communications. For example, in an emergency involving multiple agencies, first responders can share voice and data communication among their teams. Plus, centralized command and control can deploy resources efficiently, maintain communication security and track personnel.

STANDARDS-BASED PROJECT 25 INTEROPERABILITY

ASTRO 25 is a Project 25 (P25) standards-based system giving state, local and federal agencies the confidence that interoperability between multiple agencies and jurisdictions is achievable. Linking multiple P25 systems together with the P25 ISSI standard allows agencies to establish interoperability across multiple networks. A vibrant standard, P25 is endorsed by organizations around the world, and continues to evolve with the improved spectrum efficiency of P25 TDMA.

GETTING A PRACTICAL AND RELIABLE SOLUTION, **NOW AND IN THE FUTURE**

As your agency looks to expand mission critical communication capabilities, you must consider how the system will perform in the most challenging situations. In addition, you have to consider future needs and how to maximize any investments for the long term.

AVAILABILITY FOR THE MOST GRUELING ENVIRONMENTS

First responders must work in adverse conditions, such as an approaching hurricane, traffic lights out or a multi-building fire. Communications are often the only lifeline, so systems must be intuitive and always available. From built-in resiliency and redundancy to new capabilities that can allow the system to automatically switch, in case of catastrophic loss, to a geographically separated ASTRO 25 core to maintain system operation, the ASTRO 25 system has been designed to help ensure it is always available for public safety agencies.

FLEXIBLE RADIO ACCESS

When the communication system is needed, it must provide the required access. ASTRO 25 is a very flexible voice and data platform that allows agencies to use conventional, trunking, simulcast and dedicated data – all on one integrated system. With its support of multiband (VHF, UHF, 700 MHz, 800 MHz and 900 MHz), ASTRO 25 also allows multiple agencies to share one network. And it's easy to add capabilities such as P25 TDMA with software-definable equipment.

INTEROPERABILITY WITH MULTIPLE AGENCIES

When an incident demands a coordinated response, the first responder wants to be able to communicate with the right set of resources to get the job done. ASTRO 25 enables seamless communications with other agencies and jurisdictions using P25 systems. With agency partitioning, agencies can share an ASTRO 25 system to save costs and improve interoperability, yet manage and maintain control over their own resources. The modular platform allows an existing SMARTNET® or SmartZone™ system to be leveraged while building out an ASTRO 25 system. Plus, subscriber radios can work across multiple bands and multiple digital and analog systems from conventional to SMARTNET and SmartZone to ASTRO 25 for true interoperability.

CONSTANT CONTACT AND CONTROL

Command operations are a critical cornerstone to any public safety operations. As a dispatcher coordinates response to an incident, the system must be intuitive and easy to use. The MCC 7500 and MCC 7100 IP Dispatch Consoles are robust solutions that deliver mission critical functionality: emergency calls that are prioritized no matter how busy the network; high quality audio even with high traffic loads; calls set in a fraction of a second regardless of system size and true end-to-end encryption.

YOUR RADIO HAS ONE JOB TO DO KEEP YOU SAFE

IN AN EMERGENCY OTHER FIRST RESPONDERS MAY BE TEN FEET AWAY OR TEN MILES AWAY. WHEN EVERY SECOND COUNTS, PUBLIC SAFETY AGENCIES NEED A RADIO THEY CAN RELY ON TO GET THE JOB DONE.

Working with public safety communities around the world, we have redefined safety in two-way radio communications. Understanding how first responders operate radios under stress and in harsh environments is a science we pioneered, and this science of high velocity human factors plays a pivotal role in the way we design radios. The result is the APX™ series of radios; designed with the user in mind – from the rugged, easy-to-operate controls, to the loudest, clearest audio, to Integrated Voice and Data and mission critical features – APX radios keep your personnel and the community safe.

TODAY.

ACCESS TO REAL-TIME INFORMATION

Officers need to be out in the community with access to information that will help them to do their jobs better, while responding to the needs of the community. ASTRO 25 dedicated data systems allow officers to receive critical information in real time, complete routine reports, access databases and much more.

In addition to voice communications, a lifeline for first responder, the ASTRO 25 system can provide a P25 standards-based Integrated Voice and Data system, Enhanced Data functionality, plus a dedicated data-only network. A dedicated HPD data network can be installed as a stand alone ASTRO 25 system or integrated into a voice and data system providing more capacity for data applications.

- ASTRO 25 Integrated Voice and Data systems and applications can help you improve safety, productivity and efficiency.
- Enabled by GPS technology, the location of remote personnel can be quickly identified, providing faster response to an incident and improved officer safety.
- Dispatchers and mobile users can easily send and receive text messages, providing a valuable tool in maintaining communication in any environment.
- Radios can remain in the field where officers need them, while receiving critical or routine programming updates over the air.
- With an open software platform, you can add the applications you require such as field reporting, database look-ups, Be On the Look Out (BOLO) broadcast messages, license plate checks and more.

TOMORROW.

THE NEXT GENERATION OF PUBLIC SAFETY

At the heart of every mission is the ability to communicate in an instant each and every time to coordinate response and protect lives. The starting point for any public safety communications, the ASTRO 25 system is uniquely designed to deliver uncompromising voice services and provide a lifeline to the first responders. As your agency moves to the future, Motorola will stand by your side building the next generation of public safety communications systems.

INTEGRATING THE COMMAND CENTER

Maximizing situational awareness for safer, faster, better incident resolution is the goal of every command center operation. Today it means integrating voice and data dispatch. Tomorrow it means correlating voice, video and data from multiple sources, prioritizing and distributing the most relevant data to first responders in the field.

CONVERGING INFORMATION

As an officer moves across multiple P25 systems, visibility in the home network is important. Converging voice-centric workflows in the future will provide a more holistic understanding of an incident and better decision making where it matters most.

INTEROPERATING ACROSS PLATFORMS

Public safety needs to communicate regardless of technology or jurisdiction boundaries. Today you can interoperate across multiple P25 systems and multiple bands. In the future, bridges will be built between P25 systems and Public Safety LTE broadband systems.

COLLABORATING DEVICES

Receiving the right information over the right device is critical to any public safety operation. Pairing mission critical two-way radios with companion data devices allows you to supplement voice with rich-media content for improved decision making. In the future, responders will access voice talkgroups to push images or video to the accompanying data devices over a broadband network.

IMAGINE A WORLD WHERE TECHNOLOGY IS SECOND NATURE

INCREASE RELIABILITY DECREASE COSTS NEUTRALIZE THREATS

Benefit from our experience, knowledge and know-how. Our leading public safety technology and sound methodologies ensure intelligent growth strategies and best-in-class, standards-based solutions.

UNPARALLELED FLEXIBILITY IN SYSTEM DESIGN

From single site to country-wide deployments, ASTRO 25 is a flexible, modular system with advanced call processing capabilities designed to meet the needs of public safety. ASTRO 25 can adapt and change to accommodate additional users, increased geographic coverage, trunked and conventional systems, Enhanced Data applications and connectivity to other systems to ensure an efficient and cost-effective solution for decades to come.

LEVERAGE INVESTMENT FOR YEARS TO COME

Standing by your side over the life of your system, the ASTRO 25 system provides P25 interoperability today and is a flexible solution that can support future advancements in mission critical communications. Motorola provides a modular platform that allows agencies to start investing in P25 capabilities while gradually migrating an existing analog, SMARTNET or SmartZone system to ASTRO 25.

INFORMATION ASSURANCE

Keeping your system up and running is critical for public safety. Information assurance helps to manage information-related risks on an ASTRO 25 system to ensure the confidentiality, integrity and availability of information. This is accomplished through prevention, detection and response.

SYSTEM MANAGEMENT

A robust portfolio of system management tools allows a public safety agency to remotely manage the health of the system, as well as configure and manage the system network and subscriber equipment from a central control point. Centralized network configuration and fault management enable changes to be automatically distributed throughout the ASTRO 25 system, saving valuable technician and administrator time.

BRINGING IT ALL TOGETHER SO YOU CAN FOCUS ON YOUR MISSION

Motorola provides robust network design plus centralized pre-build and testing for timely and efficient system deployment. We offer ongoing support to maintain peak technical and operational performance including 24 x 7 network monitoring, anti-virus support, firewall and intrusion management, basic repair, and system management and operations.

DESIGN	Systems designed to optimize mission critical operations and enable interoperability with other P25 systems, Public Safety LTE networks, commercial carrier networks, two-way radio systems and agency enterprise data networks.
IMPLEMENT	Unparalleled expertise and experience in deploying large-scale public safety networks that marry IP-based networks with optimized transport of voice and data services across wide and local area networks in the most challenging environments.
SUPPORT	ASTRO 25 system performance and continuity assured with 7 x 24 x 365 network monitoring and triage. Emergency response teams engage directly with development, production and factory engineers for rapid resolution.
SECURE	Defend against threats and protect data resources for gap-free security across the entire communication platform from applications, RF system, IP transport, down to the data on a user's device.
MANAGE	Our experienced team of system managers, project managers and IT professionals can manage the support of public safety and government agencies for maximum cost-of-ownership efficiencies.

AT ANY MOMENT...

SEVERAL CARS WILL COLLIDE IN AN INTERSECTION

A FIRE WILL SPREAD TO MULTIPLE BUILDINGS

HAIL AND HEAVY RAIN WILL CAUSE A POWER OUTAGE

YOUR MOMENT IS COMING.

WHEN YOU NEED MISSION CRITICAL COMMUNICATIONS,
WHO WILL YOU RELY ON?

APOPKA, FLORIDA

LATEST TECHNOLOGY DOUBLES RADIO CAPACITY, DELIVERS INTEROPERABILITY

"As a Motorola customer for more than 30 years, we were confident that Motorola Solutions' P25 TDMA solution would double our system capacity and improve our overall operations. Multiple agencies share our system; it did not matter that we adopted P25 TDMA and some others have not done so. We can communicate seamlessly with all of them, including public works operating in 700 MHz FDMA. The support provided by Motorola's product and systems groups was invaluable in meeting the challenges of implementing this new technology."

Richard Anderson, Chief Administrative Officer, City of Apopka

ARIZONA STATE UNIVERSITY

DEPENDABLE COMMUNICATIONS MEAN A SAFER CAMPUS

"Our primary objective is the security of the residents and property of Arizona State University (4 campuses and 65,000 students). In the past, we didn't really have a means of communicating with other agencies. We had the Insight Bowl game played at Sun Devil Stadium. I was able to go to a Tempe traffic channel and talk to their traffic sergeants about our post game plan as things changed. I didn't have to rely on phone contact, and the information was immediately shared with others across the radio system."

Corporal Larry Fuchtmann, Special Events Coordinator, Arizona State University

COBB COUNTY, GEORGIA

THE STORM OF THE CENTURY STRIKES

September 19, 2009 marked one of the worst storms in the history of Georgia. Rivers swelled from two feet to 20 feet. Vehicles were swept away. 250 roads were closed. Lightning hit the Sandy Plains repeater site. Tracy Roberts explained the importance of having 24x7 system and site monitoring on the radio system during the disaster, "I received three different emails from the Motorola Network Operations Center about three component failures. Not only did I receive this information, but Motorola's certified service shop did and immediately sent technicians out to evaluate and repair the site. I can't emphasize how important it was that we had the situation stabilized before the first user in the field even called in."

Tracy Roberts, Communications System Manager, Cobb County, GA

MISHAWAKA, INDIANA

WORKING SMARTER AND FASTER

"Street guys receive so much more information on their way to the call. Cross streets can pop up if you need directions to the scene. Officers can look up information without having to tie up voice traffic or drive to the station. It's a huge time saver", Russ Haimbaugh explains about the HPD overlay on the ASTRO 25 citywide system. "Another great feature is car-to-car messaging. Officers can quickly share information with other officers on duty. The more data we make available to officers, when they're working the beat, the more comfortable they will be going into a situation and once they get there, they will be able to make better decisions."

Russ Haimbaugh, NetRMS Administrator, Mishawaka, IN

At the heart of every mission is the ability to communicate in an instant to coordinate response and protect lives.

Come with us as we lead the way to the next generation of public safety solutions. Start with the world's most widely deployed P25 voice and data platform. Build on it in the future with broadband connectivity, rich-media applications and collaborative devices that carry crucial voice, data and video into the field and into the hands of first responders.

Work directly with a Motorola specialist. Consider all the advantages of ASTRO 25 and consult with Motorola specialists to design or upgrade a system to meet your requirements. Motorola's extensive experience in delivering hardware, software, service, and support can enable any agency or municipality to assess current capabilities, measure system baselines, and design and implement solutions to optimize communications when it is needed most.

For more information on how your organization can gain the benefits of an ASTRO 25 solution that fits your needs and your budget today, contact your Motorola representative or visit motorolasolutions.com/ASTRO25.

Captain Michael Henry
Texarkana Texas Police Department
100 North Stateline Box 16
Texarkana, Texas 75501

Dear Captain Henry,

During a recent assessment of our radio system it was made clear that we are in dire need of replacing our equipment. The radio system that we currently have in place has aged and could fail us at any time without notice. Motorola is no longer manufacturing parts to repair our system should it go down. The only way to obtain any replacement parts for current system is to hope that a used part could be purchased from an agency that has already replaced a system like ours and has stored their old equipment. Should our radio system crash, our entire communication center would be out of operation while we are searching to find a part. This would obviously have a grave impact on the day to day operations of all agencies that rely on this system.

The new proposed radio system will also tremendously increase coverage in Bowie County. Under the existing system, there are many areas on the west end of the county where there is simply no or limited coverage. Currently, we only have the ability to use one channel on the west end of the county as well. The new system will not only cover nearly the entire west end of the county but will also allow the Sheriff's Office access to multiple channels in this same coverage area. This is a huge benefit that obviously increases the level of safety for our deputies. This upgrade in coverage is something that has been needed in the county for a long time.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeffrey K. Neal".

RE: Communications, CAD and RMS Upgrade

Communications Problems

As has been previously discussed, the need for a public safety communications network upgrade for the City of Texarkana, Texas and Bowie County has reached the critical stage. Each passing day brings us closer to a complete system failure. Failure would mean the loss of communications for law enforcement, the fire department, public works, and the water department. It would also seriously hamper communications with outside agencies, such as emergency medical services and neighboring jurisdictions.

The existing analog radio system is eighteen years old. Motorola can no longer guarantee part availability of the SMARTNET system, and has removed the replacement guarantee from our service contract. While they will attempt to fix our system if we have a failure, they are no longer obligated to as we are now in "best effort" support. In the event of total uncorrectable system failure, our only options would be to purchase a new system or attempt to find replacement parts on the internet. The system cannot take advantage of the advances in technology that a new digital system can provide. Interoperability with other public safety agencies and growth for additional users is limited. Improved and expanded coverage of the system is crucial.

As presently configured, the communications system does not provide coverage of Bowie County outside of the Texarkana area. This poses a serious and sometimes dangerous situation for sheriff's deputies, particularly on the western end of the county. For many years, the Sheriff's Office has attempted to overcome this problem by placing repeaters on towers in New Boston and Maud. This does increase coverage somewhat, but that solution only allows for one channel which is inadequate for any type of major situation. Even with the repeaters, there are many areas that are not covered, especially when a deputy is out of their car using a portable radio. Oftentimes that is precisely when they are most vulnerable.

As you know, in this day and age law enforcement and fire departments may be faced with many situations that expand beyond their capabilities. This can happen in any jurisdiction. Everyone

must be prepared to assist neighboring agencies in such an event. If our police department, fire department or both were to be called into an area of the County that is outside of the reach of our communications system, we would be left with no ability to contact our dispatch center or the other involved agencies. Obviously this would render our assets of little use to anyone. This is a scenario that is long overdue in being addressed.

While there has been some steps taken over the last few years to procure a new system, the need to act quickly became magnified in June when key components of our current system failed, leaving the public safety services within the City and County with extremely limited communications capabilities for several days. The police department, fire department and the sheriff's office were each limited to one channel for all of our communications needs. The radio system is so old that the radio technicians literally had to search the entire nation to find spare parts to patch the system back together in order to restore service. The replaced site controller, which is the brains of the system, was the only one Motorola had. The search for parts went as far as scanning EBay. The ultimate replacement was not even the correct part, but a compatible one. While that situation was dire, it pales in comparison to the problems that would arise in the event of complete system failure. If the system fails, it could take up to 18 months to purchase and install a new system.

CAD and RMS Problems

The Computer Aided Dispatch (CAD) system is meant to help our dispatchers handle calls and situations more effectively and efficiently. It is a real time command and control process, that tracks information relating to all (Police, Fire, Sheriff) emergency calls and field unit activity. The current system was purchased approximately a year and a half ago, but it unfortunately is not effective or efficient. It has been plagued by numerous problems and the vendor, Tyler Public Safety, has not been able to resolve all of the issues. The system deficiencies affect both the police and fire departments and place the safety of our citizens at risk. The system was purchased on a six year plan in which the first year has been paid. It is recommended that a new CAD system be purchased, the city funding for the remaining five payments be unappropriated and the relationship with Tyler Public Safety be severed.

The police department has been using a Records Management System purchased by Bowie County a few years ago. The system was not designed for a municipal police department and does not adequately fit our needs. It does not integrate well with the City Court and does not have a module for citations. It has inadequate property management. It has no alarm permit tracking or billing function. It has no investigative case management or sex offender tracking. It cannot produce racial profiling reports. There is no functionality for intelligence tracking. The lack of a

proper RMS has hampered the department's efforts to move towards a paperless system, created backlog and caused numerous inefficiencies and increased errors.

Solution

Motorola is the provider of the current radio system and was used by the City for many years even prior to that acquisition. They have local repair technicians who have provided prompt and excellent service when the need has arisen. Motorola Solutions has an in depth knowledge of our needs and has had engineers on location to analyze our requirements. They have stated that they could begin work on replacing the network by the end of the year. When considering the critical need for immediate replacement, Motorola is in position to best fill that need.

Motorola has the reputation of being the best source for public safety communications systems. They have a proven track record. They have installed numerous P25 digital trunked systems throughout the nation. Many of our recently purchased portable radios as well as numerous mobile and portable units from other agencies throughout the county are Motorola and can be easily upgraded to work on the new digital Motorola system.

It is also crucial that we maintain interoperability with Texarkana, Arkansas. They operate on the AWINS system which utilizes Motorola equipment. The State of Texas also utilizes Motorola. Most all area public safety agencies operate on Motorola equipment. Purchasing a Motorola system will ease the process of maintaining interoperable communications with surrounding jurisdictions.

Motorola has worked with our representatives and has proposed a four tower system that will carry us forward for the next fifteen to twenty years. With tower sites on New Boston Road and Texarkana College Farm, and two more towers near New Boston and DeKalb, the system will provide reliable communications county-wide. The Bowie County Sheriff's Office will no longer be limited to one unreliable channel on the west end of the county. They will have access to every channel and talkgroup on the system anywhere in Bowie County. In the event that Texarkana Police or Fire Department assets respond to assist in a critical situation outside of the City, our units will continue to have the same communications ability that exists within the city limits.

Motorola is also able to provide a new CAD and RMS package to compliment the new radio system. It would replace the current much maligned CAD and RMS system presently in use. Motorola has a Tier Two product and they are offering discounts for purchase concurrent with the radio system. CRC and Fire Department personnel have had a chance to see a demonstration of the software and all were impressed. The Motorola RMS will allow the police department to modernize its processes and increase effectiveness and efficiency. Having all three public safety

systems (communications, CAD and RMS) provided by the same vendor would allow seamless integration between all three products and give us greater functionality than has ever existed.

Motorola Solutions has submitted bids to provide communications systems and services through Houston/Galveston Area Council of Governments Cooperative Purchasing Program, HGACBuy. Contracting through HGAC is compliant with Texas state statutes for competitive bidding. Motorola has submitted negotiated pricing discounts that go below HGAC pricing and that include significant incentives for purchase prior to the end of the year.

Denton County

In looking at our preferred vendor, we found that Denton County, Texas has recently purchased a Motorola P25 system and is in the process of implementation. Interestingly, Denton County has been operating on the same Motorola analog system that we have and it was originally installed at about the same time as ours. Denton County made the decision to upgrade, and though they will have more dispatch consoles and subscriber units, their needs for a system mirrored our needs.

Denton County formed a fifteen member committee to evaluate communications systems. The committee members came from the sheriff's office, police departments, and fire departments. The membership included police officers, fire fighters, deputy sheriffs, IT personnel, communications specialists and purchasing agents.

The committee took a very in-depth look at the prospective vendors and their equipment. They devised a detailed evaluation matrix that scored each system in the areas of functional requirements, overall system design, company qualifications and project management plan, and proposed service/support/warranty provided. Their goal was to rank the firms to provide the best value for the county by considering cost and technical requirements for long term utilization. There were numerous committee meetings, presentations were made, offers were submitted, clarifications made and vast amounts of documentation reviewed. The committee spent three months on their review.

A five year cost was determined for each system. A technical score was arrived at for each vendor based on the evaluation matrix. Denton County applied the Dollar per Technical Point method of evaluation by dividing the five year cost by the technical score. This evaluation demonstrated that Motorola had the best value for each dollar expended. The Denton County evaluation showed in writing why the cheapest isn't always the best overall value.

Along with the committee's unanimous recommendation, the Denton County Sheriff, the Director of Emergency Services, as well as numerous police and fire departments within the county all agreed that Motorola was the preferred vendor. In speaking with Denton County recently, the

installation and implementation process has been progressing smoothly and on schedule. The Motorola system allows Denton County seamless interoperability with the City of Fort Worth Motorola system as well as other older Motorola systems in the area.

Assessment

Motorola is in the position to update our system on a fast timeframe and has a proven track record. Having a Motorola system will allow seamless integration with the Texarkana, Arkansas AWINS communications system. All departments involved feel that Motorola is the best choice given the critical need to upgrade the system as soon as possible.

The current Motorola system has performed very well for over 15 years and has proven to be consistently reliable. Considering the fact that very little funding has been available to keep the system updated through the years makes it even more impressive. We are all familiar with their product and know that qualified local service technicians are available. It is felt that the Denton County evaluation supports the conclusion. Since time is not on our side and the need for a new system is urgent, reliance on the Denton County study is prudent.

Also, the Motorola CAD and RMS systems are recommended by police, fire and CRC personnel as the best systems to fill our current needs, provide reliable and dependable functionality and carry our departments forward for several years to come.

Costs

Motorola has provided budgetary pricing on all three systems. The final price is not known at this time, but it will not exceed \$9,000,000.00 total for the communications system, CAD and RMS systems. Warranty and maintenance costs for the communications system is expected to be free the first year and then around \$150,000 a year for years two through five. Maintenance fees for the CAD and RMS systems are not known at this time. Motorola has submitted a 15 year municipal lease-purchase financing option with the first two years deferred.

Conclusion

Motorola will provide a known reliable communications network, as well as CAD and RMS systems, that carry the confidence of the area's public safety professionals. It is recommended that the Police and Fire Departments seek the approval of the City Council to purchase and install a

Motorola P25 Digital Trunked Radio System, a Motorola Computer Aided Dispatch System and a Motorola Records Management System.

Dear Councilmember Miller:

H-GAC is the Houston-Galveston Area Council which is a regional council of governments, a counterpart of our ATCOG. H-GAC has formed the HGACBuy network wherein local governments can use their cooperative purchasing service via an interlocal agreement as permitted by the Texas Interlocal Cooperation Act.

HGACBuy benefits participating local governments by giving access to volume purchasing and discounts. From their webpage, "All contracts available to participating members of HGACBuy have been awarded by virtue of a public competitive procurement process compliant with state statutes." <http://www.hgacbuy.com/home/>

Additionally the Local Government Code provides the following:

Sec. 271.102. COOPERATIVE PURCHASING PROGRAM PARTICIPATION.

(a) A local government may participate in a cooperative purchasing program with another local government or a local cooperative organization.

(c) A local government that purchases goods or services under this subchapter satisfies any state law requiring the local government to seek competitive bids for the purchase of the goods or services.

I have been advised (I personally do not have a login to check) that the HGACBuy pricing has been recently updated [I believe with the recent Denton County Motorola purchase via HGACBuy] wherein some unit pricing was reduced. I am also advised that in our negotiations that Motorola has further discounted some of the HGACBuy pricing. I believe that it would be difficult for an individual small to moderate size purchase to be able to beat the cooperative pricing via a new competitive process.

If we initiate a new competitive purchasing process we would likely go through HGACBuy to obtain consulting service to write the scope of work that would be included in any competitive bidding process.

In addition to taking advantage of the volume pricing achieved by the HGACBuy purchase we are also avoiding consulting costs of starting from scratch.

I hope that this information is helpful.

Sincerely,

John A. Whitson, ICMA-CM

Mr. Whitson: as part of the presentation at the last couple of council meetings, there was discussion about the proposal to purchase the radios through the HGAC program and that going that route would allow the City to meet competitive bidding requirements. Can you provide me with some information on how going through HGAC means the systems we are talking about purchasing are competitively bid at HGAC? And, when or how we can be sure that we are getting the best prices going that route?

Thanks.

Bill

Dear Mr. Mayor, Councilmen and Women,

The 9 million dollar estimate on the radio system seems extremely overpriced. The following estimate is with today's pricing and we can lease space on existing towers and save the other \$500,000 or so. This system has real time GPS to track officers on the ground. This covers all of Bowie county.

If you take the time to open the attachment you will see another option for the city of Texarkana that will be no cost for the towers and simply to upgrade the consoles to new, with one of them being a GPS console. Scroll down three times for the entire offer.

- Construction of four (4) three hundred foot towers = \$400,000.00 (one is a bridge tower)
- Four (4) Communication Building to house equipment = \$120,000.00
- o Could lease space on existing towers instead of building towers
- Fixed equipment at each tower site (four (4) sites) = \$250,463.52
- Combination of two (2) hundred mobiles/portables = \$160,000.00
- o Installation of mobiles = \$26,200.00
- Five (5) new dispatch consoles = \$375,000.00
- Installation and optimization of all fixed equipment = \$266,332.70

Total Cost of System = \$1,597,996.22

Please consider going out to bid, it is a disservice to the tax payers of Texarkana not to ask for the best price.

Thanks, Steve Ledwell

Re: Radio System Upgrade

In light of the impending discussions concerning the radio system upgrade, I wanted to take a moment and share with you TAPD's position with respect to the upgrade. As you are aware, TAPD maintains a complete digital radio system that remains concurrently operational to the ailing analog system. This digital radio system provides TAPD with true radio and dispatch redundancy, and should the analog system fail, TAPD can immediately revert to the digital system without any interruption in service. Because our radio communications needs are satisfied with the concurrent digital radio system, TAPD will not be participating in the radio system upgrade project currently being discussed.

I wanted to use this opportunity to shed some light on the current digital radio system already in place. This system was brought on-line some time ago through a tri-county digital radio system grant project that enabled our system to interface with the Arkansas Wireless Information Network. TAPD elected to participate in this project only after securing an agreement allowing Texarkana, Texas to take operational partnership in this local system. This agreement was critical in bringing the radio system on-line, as we jointly operate a communications center responsible for emergency communications for both cities. In fact, critical radio infrastructure is currently operating in your city on property jointly owned by the twin-cities, so TAPD fully expected your city to operationally participate in this radio system.

As Texarkana, Texas and Bowie County enter into negotiations to replace the ailing analog system, please remember the digital radio system already in place remains capable of accommodating the radio communication needs of not only your agency, but the system is also capable of accommodating your fire department and members of your city government. In fact, the system allows your agency and other agencies/users in your city to program channels and assorted talk groups in a manner consistent with the needs of your city. The digital system is operating as designed, as the recent radio patch that bridges the two systems together has shown no evidence of system malfunction during the period in which the increased load was placed onto the digital system.

As this radio upgrade process begins to unfold, please let me or members of my staff know if we can assist.

Attachment: Email from Mr. Steve Ledwell (1212 : Res. No. 2014-131 Public Safety Radio System)

AWIN the Arkansas Wireless Information Network

June 18, 2014

Capt. Glenn M. Greenwell
Services Division Commander
Texarkana Police Department
P O Box 1885
Texarkana, AR 75504-1885

Dear Capt. Greenwell,

I have reviewed the past history (design documents, meeting notes and e-mails) regarding the deployment of the Arkansas Wireless Information Network in Texarkana and can share the following information below in regards to the use of AWIN by Texarkana, TX public safety organizations.

Was the system engineered to accommodate public safety organizations in Texarkana, Texas? There was a series of meetings held in Texarkana in late 2004 where the project was discussed. During these meetings the use of the system by the Texarkana, Texas public safety organizations was specifically discussed and it was explained that the coverage and capacity for Texas organizations were included in the planning for the system. Also, during a discussion on User Fees it was stated that Texas users would not be charged a user fee.

Is there additional cost associated with bringing the Texarkana, Texas public safety organizations onto AWIN? Based on the information above, no additional infrastructure would be required for users in Texarkana, TX to use AWIN.

Is there additional cost associated with bringing the Bowie County Texas public safety organizations onto AWIN? For an organization the size of Bowie County the associated cost would be for the additional infrastructure to support their use. Normally we recommend to this type of large organization that they work with our infrastructure vendor to correctly size the number of additional channels needed, and the placement of sites to ensure they have adequate coverage and capacity. After an organization has joined AWIN no costs are assessed to the organization for on-going costs. AWIN Operations and Management is responsible for maintaining and operating the system.

I hope this answers your questions and if there is any other information we can provide please let me know.

Sincerely,

Penny Rubow
Director, Arkansas Wireless Information Network

Attachment: Email from Mr. Steve Ledwell (1212 : Res. No. 2014-131 Public Safety Radio System)

From: TTPD-Henry, Michael
To: [TEX-Whitson, John](#)

Subject: Radio Upgrade Questions
Date: Monday, November 17, 2014 4:01:00 PM

This morning I spoke to Mr. Bill Miller concerning our proposed new public safety communications system. He wanted clarification on some issues:

1. Can we get detailed prices on the Motorola proposal so that comparisons can be made with the estimate provided by Mr. Ledwell?

Motorola is currently working to provide a more detailed breakdown of the components in their proposal and the associated costs. They are hoping to have that to us later today (11-17) or possibly Tuesday.

We also discussed that the system we are needing is a P25 compliant 800mhz digital trunking system with seven channels and four simulcast sites. It is unclear what type of system is offered in Mr. Ledwell's proposal.

2. What is the reasoning behind not joining the AWIN system and what are the costs to get the AWIN system upgraded?

The AWIN system is eight years old. The core, or the "brains of the system", must be upgraded in the near future. The consoles, which are basically the workstations for the dispatchers are also in need of replacement. We could utilize the AWIN system with minimal upfront costs. However, we would lose functionality that a new system would provide in fire station alerting, GPS positioning, over the air programming and text messaging to the radios, among other things. It also would not satisfy the coverage issues in Bowie County. We would have little control over the system, as the core resides in Little Rock, AR.

The cost of the upgrades to the AWIN system cannot be fully answered. There are too many variables to cover. In order to achieve the same functionality as offered in our current proposal, the entire AWIN system would have to be upgraded. It is unclear who would bear the responsibility of the costs of the various components and what the timeframe of any upgrades would be.

3. Why do we need to put towers in Bowie County?

As presently configured, the communications system does not provide reliable coverage of Bowie County outside of the Texarkana area. This poses a serious and sometimes dangerous situation for sheriff's deputies, particularly on the western end of the county. Also, if our police department, fire department or both were to be called into an area of the County that is outside of the reach of our communications system, we would be left with no ability to contact our dispatch center or the other involved agencies.

4. How urgent do I feel is our need to replace the radio system?

As I have mentioned previously, there is no way of knowing how long our present system can keep operating. It is eighteen years old, there are no spare parts available and it recently failed and had to be patched back together in order to restore service. It could keep operating for another year or it could literally stop working at any moment. The radio system is crucial to our ability to provide fire and police services to our citizens, so any delay in replacing it poses a substantial risk.

5. What will happen to the price of the Motorola radio system if we do not order by December 15, 2014?

The answer is unclear. The pricing provided by Motorola for our current proposed system is based on the HGAC contract. In that contract, Motorola offers radio system components to members of HGAC at reduced prices. Motorola has offered an additional \$1,023,000.00 in discounts if our order is placed before December 15, 2014.

The current HGAC contract expires April 30, 2015. I have no way of knowing if the next contract with Motorola will result in an increase or decrease in the prices offered. I also have no way of knowing if Motorola will offer the same incentives to us if our purchase of the system is delayed.

We also discussed that in October of 2010 a proposal was submitted by Motorola to upgrade our system to a four site Simulcast system, much like our current proposal. The budgetary pricing summary for that proposal was \$7.3 million dollars, not including construction of new towers or providing buildings at the tower sites. That proposal was based on connecting the proposed system to the AWIN master site. A copy of that proposal is available for review.

RESOLUTION NO. 2014-131

Questions from Mr. Richard Martin during public hearing on 11-10-14:

1. Is our current system on lease purchase arrangement?

The various components of the system currently in use were purchased separately over several years. How each piece was financed is not known. However, there is no outstanding debt or any type of lease arrangement on the present communication system.

2. Does it include maintenance in this agreement?

Maintenance fees are ongoing annual costs throughout the life of the system. They are not included in the original purchase price, but they have been accounted for in the long term financing plan.

3. Is this an annual payment a monthly payment? What are the terms on this amount of money?

The recommended financing plan is a lease-purchase agreement for a fifteen year period with the first two years deferred. The payments would be made annually.

Subject: Radio System Upgrade
Date: Tuesday, November 18, 2014 3:16:42 PM

Mr. Whitson,

This email summarizes the content of my face to face meeting with TAPD Police Chief Bob Harrison. The meeting occurred on November 18, 2014 at 11:00 AM in my office.

The purpose of the meeting was two-fold and the first issue was to inform Chief Harrison that we have received some asset forfeiture monies and that it was our intent to honor preexisting agreements concerning distribution of those funds when a joint investigation is conducted. An amount in excess of \$28,000.00 would be divided pursuant to our agreement.

The second part of our meeting was a discussion regarding our desire to upgrade TTPD's radio system. I explained the reasons we wanted to have our own locally based system and the regional benefit of such a system for our allied emergency services agencies, should they want to utilize the system. I also reviewed our ongoing concerns about AWIN's current half-life status and the fact that the controller is located in Little Rock.

He admitted that at one time he did want TTPD on AWIN's, but now understands our concerns and no longer cares one way or the other. He has no problem with TX having its own system, but does want it to be a Motorola system.

Chief Harrison confirmed that he believed it was important that TTPD use a Motorola radio system for compatibility and stated unequivocally that he was VERY interested in the Motorola CAD solution and possibly the RMS, depending on the costs. I briefed him on our plan to seek Council authorization to acquire the radio system immediately and with Motorola's agreement to offer 180 days of guaranteed pricing to acquire Motorola's CAD and RMS. During this 180 days, we would have time to resolve our issues with Tyler Technologies. Chief Harrison agreed that was an excellent strategy.

We agreed that our departments need to operate on the same CAD and the current Tyler version is unacceptable.

I also expressed my concern about local rumors and misinformation, and asked him to personally speak to his friend, Steve Ledwell, to make sure he had accurate information. Chief Harrison agreed that he would make contact with Mr. Ledwell.

Dan Shiner

NOVEMBER 3, 2014

Current Issues

- Calls disappearing
- Comments missing
- Performance issue when 15+ calls are open
- (Under Review) Unit Allocation Incorrect
- Unit Allocation not completing
- Units showing up on incorrect calls
- Object Mouse Move Error – results in program crashing
- Caller phone number and name – Not showing in mobile units
- Call Merging – Comments from one or both calls disappear
- Units being assigned to incorrect calls
- Incorrect units being assigned to calls

Ongoing Issues

- Multiple Dispatchers cannot assign units to calls
- Performance issues and Instability
- Quality Assurance issues
- Random Errors, lockups , and crashes
- Warrants not consistently transferring from Incode Municipal Package
- Combined Search does not return all warrants from Odyssey – inconsistent information

Deliverables not met

- One Search
- State LETS in mobiles for Arkansas
- Export to TAPD Data Force software
- Routing – Turn by turn directions

Features not implemented due to ongoing issues

- Unit Allocation for PD and Volunteer fire departments
- AVL - Closest unit recommendation for PD
- Combined Search
- Wrecker/Impound Module
- Redesign (work around) for proper dispatching of Automatic Aid

PUBLIC SAFETY COMMUNICATIONS UPGRADE

THREE SYSTEMS

- **Communications System – Radios**
- **CAD - Computer Aided Dispatch**
- **RMS – Records Management System**

TEXARKANA TEXAS PUBLIC SAFETY COMMUNICATIONS NETWORK UPGRADE IS CRITICAL!

- **RADIO SYSTEM IS ABSOLUTE NECESSITY**
- **ONLY WAY TO EFFECTIVELY COMMUNICATE WITH OFFICERS AND FIREFIGHTERS IN THE FIELD**
- **RADIOS ALLOW COMMUNICATIONS BETWEEN UNITS TO COORDINATE RESPONSE**
- **THE RADIO IS THE LIFELINE FOR THE POLICE OFFICER OR FIREFIGHTER IN HARM'S WAY**

TEXARKANA TEXAS COMMUNICATIONS SYSTEM AND OPERATIONS PRESENT STATE

7.7.s

- Our Public Safety Communications System is in excess of 15 years of age.
- Many of the components of system are no longer supported in the case of failure
- The City and County are in desperate need of Improved radio coverage due to growth over the last 15 years.
- Interoperability and growth for additional users is limited
- Dispatch operations technology failures and lack of advancements.
- We are unable to take advantage of technology advancements and efficiencies.

TIME TO REACT IS NOW

AWIN IS NOT THE SOLUTION

- Proposed 4 tower system in October of 2010 using AWIN system. Preliminary price tag was \$7.3 million, without towers or buildings.
- The AWIN system covering Texarkana, AR and Miller County was installed in 2006 by the State of Arkansas.
- The core, brains of the system, operates on an older platform which has reached its end of life and must be upgraded.
- Many features such as GPS and Over the Air programming are not available on AWIN.
- The Core resides in Little Rock, AR, meaning all of our radio communications would be controlled by a platform over 150 miles away.
- Bowie County Sheriff, Nash PD, Wake Village PD, Texarkana College, TAMU-T and others are all users of our current system and may not have access to AWIN.
- Using the AWIN master site will save only \$450,000 to \$650,000 out of over \$7 million and we will be on a system that is halfway through its lifespan.

PROPOSED SYSTEM SOLUTION INCLUDES

EXPANDED COVERAGE

Provides the coverage needed for First Responders to perform their duties in a safe and effective manner without worrying about not having the coverage they need. Citizens can feel confident, no matter where they may be, that emergency personnel will be able to focus on the task at hand.

INTEROPERABILITY

First Responders are able to easily communicate with local, state, and federal agencies directly through the network.

GREATER EFFICIENCY

Assures instantaneous two-way voice communications for every agency operating on the system.

SHARING RESOURCES

Helps make sure people and equipment are where they are needed the most. Increased cooperation between different agencies on every level helps make sure our citizens are safe in the most cost effective manner.

LOCAL CONTROL

Each agency has complete autonomy in operating its own communications resources. In the event of a crisis however, it is easy to communicate with neighboring agencies for assistance.

EXPANSION OF BI-STATE

Has the capacity to accommodate more agencies and users with each agency. The system can grow to meet future needs.

**COMPETITIVELY BID HGAC PRICING
SIGNIFICANT SYSTEM PRICING INCENTIVES (P25 AND CAD)
15 YEAR MUNICIPAL LEASE FINANCING
UP TO TWO YEARS BEFORE FIRST PAYMENT**

- **Motorola is the industry leader in public safety communications.**
- **We did take a look at Harris Corporation, but they do not have the proven track record of Motorola.**
- **Motorola is in the position to update our system on a faster timeframe.**
- **Denton County was on the same system we are on. They are moving to the same Motorola system we are moving to.**
- **Denton County formed a fifteen member committee to evaluate communications systems. Motorola was the unanimous choice.**
- **Having a Motorola system will allow seamless integration with the Texarkana, Arkansas AWIN communications system.**
- **All departments involved feel that Motorola is the best choice given the critical need to upgrade the system as soon as possible.**
- **Motorola is also able to provide a new CAD and RMS package to compliment the new radio system.**

- **Computer Aided Dispatch**
- **The Computer Aided Dispatch (CAD) system is meant to help our dispatchers handle calls and situations more effectively and efficiently.**
- **The present CAD system has many issues including improper unit allocation, missing comments, and disappearing calls.**

- **Records Management System**
- **Software program that manages all Police Department records including: victims, witnesses, suspects, locations, offenses, arrests and much more.**
- **Modernized department should be near paperless**
- **Investigative case management**

- **We do not have an RMS. The police department has been using a Records Management System purchased by Bowie County a few years ago. The system was not designed for a municipal police department and does not adequately fit our needs**

THE RESULTS OF OUR RESEARCH AND PLANNING

- Upgrading to Digital Technology will allow support for the next 15 years + of the Public Safety Network.
- Our planning has included the needed additional coverage now and into the future.
- The New Technology will allow many additional features required for our Public Safety needs. GPS, IV&D, Fire Station Alerting, CAD, Records Management.
- Our planning includes Dispatch Technology that allows advanced CAD and integration to the Public Safety Radio Network.

OUR DECISION WILL ACHIEVE TEXARKANA'S GOALS

THE GOAL:

ACHIEVE EXPANDED COVERAGE

ACHIEVE GREATER INTEROPERABILITY

REPLACE "OUT OF LIFE" TECHNOLOGY

SUSTAIN COMMUNICATIONS FOR MULTIPLE
AGENCIES AT THE MOST EFFECTIVE COST

PURCHASE

- Depending on which agencies decide to participate in the CAD and RMS systems, the overall cost for all three systems is expected to fall between 8.5 and 9 million.
- Motorola Solutions has submitted bids to provide communications systems and services through Houston/Galveston Area Council of Governments Cooperative Purchasing Program, HGACBuy.

- **HGACBuy is a "Government-to-Government" procurement service available nationwide.**
- **Governmental entities have been procuring products and services through HGACBuy for over 30 years**
- **All contracts available to members of HGACBuy have been awarded by virtue of a public competitive procurement process. Contracting through HGAC is compliant with Texas state statutes for competitive bidding.**
- **Other large entities in the State of Texas have recently purchased Motorola systems by utilizing HGAC .**

CITY OF FORT WORTH

- Purchased Motorola system in 2011
- Purchase cost was \$39, 345,641. 55 for hardware, software and services acquired from Motorola Solutions, Inc.
- \$ 2, 900,000.00 for engineering, consulting, and other professional services from BGA through March 2015
- Even though they spent almost three million dollars on a consultant, the City of Fort Worth made their purchase using HGAC, which is the same pricing we are getting.

From city resolution on using HGAC *Staff reviewed the pricing and determined it to be fair and reasonable.*

Why Motorola?

Motorola has the reputation of being the best source for public safety communications systems. They have a proven track record and are the industry leaders.

What happens to Tyler?

We are exploring our legal options to resolve the issue.

Why wouldn't we want to use AWINS?

The AWIN system is eight years old, it does not support current technology and there is no local control.

How would the system be funded?

Funding is yet to be completely identified. Increases in local sales tax, increased property values and user fees may fund all or part of the cost. In the worst case, a property tax increase may be necessary in two years.

Has the system been bid?

It has been bid through a competitive procurement process through HGAC.

What is HGAC?

H-GAC is the Houston-Galveston Area Council which is a regional council of governments, a counterpart of our ATCOG.

How do we know we have the best pricing?

We are getting the benefit of cooperative purchasing and Motorola is offering incentives to establish even lower pricing. By going through HGAC, we are also eliminating the cost of paying consulting fees.

Will Motorola allow us to construct or contract construction of towers and facilities for the towers as long as the work meets their specifications?

The City will reserve the option to contract with local vendors for tower site construction.
